DETAILED ACTION

This communication is responsive to the amendment and response dated October 08, 2007. Claims 1-25 are presented for examination.

Allowable Subject Matter

1. Claims 1-25, after further reconsideration and search, are deemed to contain allowable subject matters, and are allowed over the prior art.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:
The present invention is directed to a method that enables the delivery of image content to information terminals that varied in display, such as a mobile phone, and permits each of the information terminals to perform optimum display by adapting the image for each of the displays.

Shin et al. (EP 10502598 A2) discloses the provision of a mobile terminal that can obtain an image from a server and change the size of the image so as to use the image as a background image by allowing a user to set the desired display area size. See paragraph 13.

Yamada et al. (US 20030184803) discloses storing image data of different size, format, and resolution as a file, with a name indicating the content of the image is used as a file name, and performing resizing conversion on a selected file image. See paragraphs 85 and 109. However, neither Shin nor Yamada, or the combination therewith teaches

the content considering resizing unit selects a combination of image processing methods for an image based on a content description file containing information relating to materials contained in the image, an object distance contained in the image, and a usage of the image; decides parameters of the selected combination of image processing methods using a target image size of the image and the content description file; and changes a size of an image obtained after image processing by the combination of image processing methods for which the parameters are adjusted into the target image size for display (as recited in claims 1 and 15). In addition, neither Shin or Yamad, nor the combination therewith teaches the methods of claims 16-25 in the manner recited in the claims. For the aforementioned reason, the limitations of claims 1-25 are allowed over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure are as recited in the PTO-892 form.
